

Vacuum Tank Trailers

Features and Benefits

Morocco is proud to offer the newly designed Eagle vacuum trailer from V.E. Enterprises. Standard features include three point suspension, two speed crank landing legs, wedge sump with four inch loading/unloading valves, quarter inch SA-36 steel barrel and is fully gusseted to withstand the rigors of both on and off road. 130 BBL (standard), 120, 140, 150, 180 and 200 BBL models available.

Options

Carboline two-part epoxy coating, walkways/handrails, side or rear entry to catwalk, gel/belly lines or belly nipples, sight glasses, pump/engine kits, ASME/DOT specs, air-ride suspension, water transport only versions

Specialty Services

Morocco Welding offers various services that are second to none. Looking at a cost-effective way to bring that truck body back to its fullest potential? Our staff will refurbish your existing body to an almost new look without the expense of new. Contact a customer representative and see how we can refurbish your truck body.

For your convenience, Morocco Welding offers roadside service with welding capabilities. We even offer evening hours and are open six days a week.

Committed to Excellence

Morocco Welding LLC was first established in 1998 by John and Nat Morocco. Morocco's mission was to build a truck body that was not only designed and well built, but a product that is custom made to meet the customer's needs and expectations. As time went on, the market demanded a more complete line of products and services. Today, Morocco Welding builds an extensive line of products from dump bodies to roll-offs.

Morocco Welding prides its success on hard work, custom products, customer service, and a staff that is skilled, experienced, and has the knowledge to understand the customers' thoughts and needs.

Service is a large part of our business. Morocco Welding understands the day does not end at five. The company offers evening hours for customers to not only consult with the engineer, but to actually see their body being built.

Built tough, the way you want it.

PRODUCTS SERVICES

**Dump Bodies / Custom Accessories
Specialty Bodies / Vacuum Tank Trucks
Winch Trucks / Liquid Storage "Frac" Tanks
Vacuum Tank Trailers / Specialty Services**

Dump Bodies

Our dump bodies are custom engineered for light duty to a heavy duty chassis. A Morocco dump body is available in steel or aluminum, depending on your specific needs. We pay close attention to quality and the finished appearance. Standard features include cab protector, high quality built side walls, floor, and under structure.

As with all products, the customer's thoughts and needs are always kept in mind.

Custom Accessories

Looking to add a toolbox, headache rack or deck plating to your rig? Morocco Welding can give your truck a classy and custom look with practical working components. With your thoughts and our creative staff, we will build you what you want. You'll take pride in knowing your truck accessories have been made from the finest polished aluminum, stainless steel or mild steel.

Specialty Bodies

Morocco Welding is committed to offering our customers a body that is custom designed to meet their specific hauling needs. Whether it's a flatbed, in steel or aluminum, or a gas bottle delivery bed, we can build it to your specifications.

We understand that all bodies are created different and must be designed for maximum efficiency.

Vacuum Tank Trucks

Morocco vacuum trucks are one of a kind. Our tankers are built with a heavier material than the competition, yet allowing more payload capacity. A unique engineering feature is our "X" design. This feature combines high strength construction and also provides a targeted baffle. Morocco will install the necessary components to meet your fluid hauling needs. Available in 80 through 110 BBL.

Distributor for Chandler Equipment

We carry Jurop, Masport®, Challenger and Fruitland pumps
