## MORE PAYLOAD, GREATER PROFIT

Our dump bodies are custom engineered for light duty up to a heavy duty chassis. A Morocco dump body is available in Hardox® Steel or aluminum—depending on your specific needs. We pay close attention to quality and the finished appearance for years of service and great looks.

Standard features include a durable cab protector, side walls, floor and under-structure. Numerous options and custom designs are available to meet your specific needs. Whether you haul coal or aggregate material, get the most profit out of your truck with a Morocco dump body.

**PROVIDING OVER 25 YEARS OF  
DUMP BODY MANUFACTURING  
EXPERIENCE**

## WITH YOUR IMAGINATION AND OUR ENGINEERING, WE CAN BUILD IT

Morocco Welding is committed to offering our customers a body that is custom designed to meet their specific hauling needs. Whether it's a flatbed, in steel or aluminum, or a service truck or even a roll off . . . we can build it to your exact specifications.

We take great pride in exceeding our customers expectations by going that extra step. It gives us great pleasure to hear a customer say, "wow, that is a great looking truck body!"

**CUSTOM BODIES THAT MEET  
YOUR PARTICULAR WORK NEEDS**

# SPECIALTY BODIES

## LET OUR TEAM TRICK OUT YOUR TRUCK!

Looking to add a toolbox, headache rack or deck plate to your rig? Morocco Welding can give your ride a classy and custom look with practical working components. With your ideas and our creative staff, we will build you what you want.

You'll take pride in knowing your truck accessories have been made from the finest polished aluminum, stainless, or mild steel.

**STAND OUT FROM THE PACK**

**ASK US ABOUT THE MANY ACCESSORIES AVAILABLE FOR YOUR RIDE.**

## GET THE "X" DESIGN ADVANTAGE

Morocco vacuum trucks are one of a kind. Our tankers are built with a heavier material than the competition, yet allowing more payload capacity. A unique engineering feature is our "X" design. This feature combines high strength construction and also provides a targeted baffle.

Morocco will install the necessary components to meet your fluid hauling needs. Available in 80–120 BBL, in your choice of steel or aluminum. Ask us about our polyurethane internal tank liner. This liner technology has provided effective tank protection for over 15 years.

With a Morocco tank, you will have the option to choose custom paint, bumpers, and tool boxes.

**PROUD TO PROVIDE NEARLY  
TWENTY YEARS OF TANK BODY  
BUILDING EXPERIENCE**

VACUUM TANK BODIES

## GET TOUGH. GET A MOROCCO WINCH TRUCK.

*Tough* is the word that best describes a Morocco winch truck. Custom made with 60,000# —130,000# hydraulic winches. Available with solid cab protectors, large tail rollers, auxiliary hydraulics and more. Built "oil and gas field work ready" with quality materials that endure the harshest conditions.

Rely on the experts at Morocco Welding to provide you with a quality product that gets the job done. Ask us about the many options available to meet and exceed your winch truck needs.

**ENGINEERED TO PROVIDE A SAFE WORK PLATFORM AND EASY ACCESS TO OPERATOR EQUIPMENT**

# WATER STORAGE, MUD AND MIXING TANKS

## INNOVATIVE LIQUID STORAGE SOLUTIONS

Morocco Welding offers an extensive line of custom built, low profile skidded 500 BBL water storage, mud and mixing tanks. We can build them to your custom specifications or choose from our standard 500 BBL low mount skid. This 1/4" thick wall cylindrical design allows for easy cleaning and it can be painted to match your company's color scheme.

### Standard features:

- One 20" pressure manway opening
- One 36" pressure manway opening
- Low profile skid design with built in pull hooks
- Two 4" heat pipes
- Flanged header pipe with four 4" connections

## BURN TABLE SERVICES

### BURN SYSTEM OFFERS CUSTOMERS UNIQUE PARTS

Whether it's repetitive parts that need cut, or just a one-of-a-kind project, Morocco Welding has the ability to provide custom burning for just about any need.

We are now equipped with the latest and greatest in burn table capabilities. Our high definition plasma cutting system is capable of plasma burning from 16 GA to 3" thick material and Oxy burning up to 12" material.

This state-of-the-art machine has true hole technology and has the capability to produce bevel cutting on material over 2" thick.

## COMMITTED TO EXCELLENCE

Morocco Welding LLC was established in 1990 by John and Nat Morocco. Their mission was to build a truck body that was not only well-designed and well-built, but a product that is custom made to meet the customers' needs and expectations. As time went on, the market demanded a more complete line of products and services. Today, Morocco Welding builds an extensive line of products from dump bodies to roll-offs.

Morocco Welding prides its success on hard work, custom products, customer service and a staff that is skilled, experienced and has the knowledge to understand the customers' thoughts and needs.

Service is a large part of our business. Morocco Welding understands the day does not end at five. The company offers evening hours for customers to not only consult with the engineer, but to actually see their body being built.

## SPECIALTY SERVICES

Morocco Welding offers various services that are second to none. Looking at a cost-effective way to bring that truck body back to its fullest potential? Our staff will refurbish your existing body to an almost new look without the expense of new. Contact a customer representative and see how we can refurbish your truck body.

For your convenience, we also offer a roadside service with welding capabilities, evening hours and we are open six days a week.
