

RATED FOR 70,000 POUNDS*

KEEPING YOUR CREW SAFE

Performing maintenance work underneath the dump body of a truck presents extraordinary hazards to service personnel. As a truck body manufacturer, we understand these risks on a personal level. That is why Morocco Welding has developed Bed Buddies.

Bed Buddies is designed to keep the dump body in a raised position, preventing it from falling in case of system failure or operator error. Bed Buddies self adjusting design safely holds dump bodies at angles higher than most truck manufacturer props, allowing easier access underneath the raised body. Keeping your crew safe is always a challenge. Let Bed Buddies help make that task easier.

Heavy duty aluminum construction with a solid center steel bushing

Safety rated at 70,000 pounds each*

2" thick rubber face keeps brace safely in place

Pivot design self adjusts to any angle

Optional wall mounted storage rack

***WARNING:
NOT FOR USE WITH LOADED BODY. TWO (2) BED BUDDIES MUST BE PROPERLY POSITIONED AND USED AT THE SAME TIME. FRAME RAIL AND LONG SILLS MUST BE FREE OF ANY OIL, DIRT OR DEBRIS. THIRD PARTY TESTED.**

Built tough, the way you want it.
